

BT-1 Bluetooth Webcam Wins Macworld Expo 2009 Best of Show Award

JANUARY 14, 2009 -- Along with 8 other new and innovative Mac products, Ecamm's new BT-1 Wireless Webcam won Macworld's 2009 Best of Show award. Macworld Expo attendees visiting Ecamm's booth got to see the BT-1 in action, streaming VGA video and stereo audio to an Apple MacBook Pro via *Bluetooth®* wireless technology.

"We're very excited to be selected for Best of Show. Macworld magazine editors recognized the BT-1 as an exciting new alternative to fixed webcams," says Ecamm's Glen Aspeslagh. "Expo attendees commented throughout the week on the device's small size, simplicity and impressive video quality."

The BT-1 Wireless Webcam will be available to Mac users in late March, and will retail for \$149. For more information about the BT-1, visit <http://www.bt-1.com>
